

Ing. Miloslav Němec

Born in 1959, graduated his master's degree in the field of Dosimetry and Application of Ionizing Radiation at Faculty of Nuclear Science and Physical Engineering, Czech Technical University, Prague.

He is an inspector of radiation protection of the Czech nuclear regulatory authority SONS (State Office for Nuclear Safety) with eighteen years of experience in this field. In his role as inspector of radiation protection, he has responsibilities for radiation protection in the uranium mining industry, discharge of radionuclides into the environment, radioactive waste repositories and legislation work.

Expert activities:

He is a Member of State examination commission for verification of special professional competence of selected personnel in uranium industry and other mining activities. He regularly lectures on radiation safety to workers in the uranium industry and on professional competence to selected workers in the mining industry. He also lectures on control of mine decommissioning and mine discharges.

As an Expert for ENSTTI (European Nuclear Safety Training and Tutoring Institute) he lectures on international courses (Pretoria, South Africa - 2016, Prague, Czech Republic - 2018, Rabat, Morocco – 2018). He cooperates with the International Training Centre "World Nuclear University – School of Uranium Production" since 2018.
